

SUMMARY

Full-stack AI engineer focused on retrieval-augmented generation — building pipelines that ground every model answer in cited evidence instead of letting an LLM improvise. Core project, DermaSense, is a medical triage system where a confident wrong answer is worse than no answer, so grounding, safety and measurable evaluation were part of the design from day one. Looking for internships / entry-level roles in applied AI & ML engineering.

PROJECTS

DermaSense — RAG Pipeline Engineer 2026

Smartphone-first skin-lesion triage system pairing computer vision with a RAG layer I designed end to end (ingestion → chunking → embeddings → FAISS retrieval → prompt building → LLM → safety check). Built a medical-corpus coverage audit, a grounding check requiring every answer to cite a real source, and a banned-phrase filter blocking direct-diagnosis claims. Passed the Phase 1 answer-evaluation gate 16/16.

Python · FAISS · Sentence-Transformers · Groq LLM API · FastAPI · Streamlit · pytest

PDF RAG Chatbot 2026

Conversational assistant that answers questions and summarizes content directly from PDF documents, built on a retrieval pipeline over the document's own text.

Python · RAG · PDF parsing · Summarization

iTantra — Team Project, Smart India Hackathon 2026

Offline Android app for ISRO's SIH problem statement (SIH26173) that relays speech between phones with no internet, using on-device translation across four languages, plus voice clips, photo sharing, roles and blood requests. I built the translation layer and optimized the AI models to run efficiently on-device.

Kotlin · ONNX Runtime · IndicTrans2

SKILLS

Languages	Python, C++
Core CS	Data Structures & Algorithms
AI / ML	OpenCV, Hugging Face Transformers, Sentence-Transformers, LangChain, LangGraph, RAG, RAGAS, Ollama, Groq, PyTorch
Backend & Tools	FastAPI, Pydantic, ChromaDB, FAISS, NumPy, pandas, scikit-learn, Git, Linux, pytest, Streamlit, Vercel

EDUCATION

QUALIFICATION	INSTITUTION / BOARD	YEAR	SCORE
B.Tech, Computer Science (AI focus)	Bennett University	2024–2028	CGPA 7.85 (current)
Class XII	CBSE	2023	85.2%
Class X	CBSE	2021	88.2%

ACHIEVEMENTS

- Smart India Hackathon 2026: team ranked 7th in the Bennett University internal round with iTantra (ISRO problem statement SIH26173).
